

SIERA MARINE SOLUTIONS

About Us

Siera Marine Solutions is an emerging enterprise dedicated to revolutionizing the maritime industry through innovative marine technological solutions.

We focus on digital resilience and sustainability, offering an extensive portfolio of services and products that cater to the modern needs of shipping operations, ensuring efficiency, safety, and environmental compliance.

Our Core Values

- Innovation
- Sustainability
- Customer-Centric
- Integrity
- Excellence

Mission:

To provide state-of-the-art marine technological solutions that enhance operational efficiency, safety, and environmental sustainability in the maritime industry.

Vision:

To be the leading provider of intelligent ship solutions that set new benchmarks in maritime Industry.

Vessel Automation and Control Systems

At SIERA MARINE, we excel in automation, control, and integrated smart ship solutions. We support a wide range of vessel automation systems from industry leaders like Danelec, ABB, Honeywell, Kongsberg, and VAF. Our expertise extends to delivering customized automation and control solutions tailored to your unique requirements.

Our Smart Ship integration solutions are designed to provide real-time monitoring, predictive maintenance, critical data analysis, and Artificial Intelligence(AI)-powered decision-making. These capabilities ensure your operations are more efficient and effective.

With our qualified engineers by your side, implementing and optimizing these advanced systems becomes seamless.

- Main Engine Control Systems
- Generators and Control Systems
- Alarm and Monitoring System (AMS)
- PLCs/DCS/SCADA Systems
- Power Management Systems
- Condition Monitoring Systems
- Aircon & Refrigeration Systems
- Steering Gear Controls
- Fuel Monitoring/Flow Meters
- Shaft Instrumentation
- Electrical Control Panels
- Tank Instrumentation
- ODME/ODMCS
- Switchboard/Control/Dist Panels

Vessel Navigation and Communication Systems

We offer a comprehensive range of sales and services for state-of-the-art electrical, electronic, and navigation systems, fully compatible with digital readiness. Partnering with industry-leading manufacturers, we meet all your navigational and communication needs.

With years of solid experience, our team ensures your specific requirements are met, whether for routine operations or project-based needs. From sourcing to commissioning, we provide end-to-end solutions, guaranteeing the best customer experience.

- Radar Systems
- Automatic Identification System(AIS)
- ECDIS and ENC's
- GPS/DGPS
- Gyro, Course Recorders and Auto-Pilot
- BNWAS & Engine Telegraph Systems
- Ship Whistle/Horn Systems
- GMDSS Equipment
- Voyage Data Recorder (VDR/SVDR)
- Weather System
- Ship Whistle/Horn Systems
- Speed Logs and Echo Sounders
- Navigation Light Solutions(Search Light/Flood Light /Accommodation Lights etc.)

Information Technology Systems and Services

We provide comprehensive IT solutions for ships, offering everything from sourcing and installing to supporting onboard IT hardware and software systems. Our robust LAN/WAN designs enable easy and secure information sharing both within the ship and with the shore.

- IT Infrastructure
- Cyber Security
- Database Services
- Remote Assistance
- Intelligent Ship Systems
- Planned Maintenance Systems
- Safety & Compliance Systems
- Vessel Performance Systems
- Loadicator
- Weather Routing Systems

We offer custom and off-the-shelf turnkey software solutions that integrate seamlessly with your environment. Our comprehensive services include development, testing, integration, and maintenance, ensuring regulatory compliance and business value.

We also offer solutions for robust data collection, management, and analytical systems, unlocking the full potential of the business data to achieve both short-term and long-term business goals.

Why Choose Siera Marine Solutions?

We offer comprehensive Shipboard Solutions ranging from cutting-edge solutions to budget-friendly retrofits for navigation, communication, computing, and automation systems.

- Well Equipped Design and Engineering facilities
- Highly qualified and experienced professionals.
- Innovative Seamless Automated Processing of Service Requests and Delivery.
- Committed to environmental stewardship for reducing carbon footprints.
- Round the Clock (24x7) reliable, high-performance service network.

We meet all customer needs through our diversified services portfolio which can be tailored to meet the unique needs of each client, ensuring satisfaction and long-term partnerships.

- ✓ Installations, Integrations, and Retrofits
- ✓ Testing, Calibration, and Certification Services
- ✓ Radio Surveys and Technical Assessments
- ✓ Ship staff Training and Familiarization on systems
- ✓ Riding Teams for Maintenance and Upgrades

Our Locations

Siera Marine Solutions operates from one of the technological hubs of India, Hyderabad, and extends its service wings to both the east and west coasts of India. Our service network is strategically located in renowned ports across India, the UAE, and Singapore, enabling us to efficiently reach and attend to ships calling at these ports. We are also expanding our network of partners in other geographical regions to cover as many ports as possible.
