

AN ULTRA MODERN SHIPYARD

ON WEST COAST OF INDIA, 70NM FROM BOMBAY HIGH

RATNAGIRI, MAHARASHTRA, INDIA

WHO WE ARE

Chowgule's journey began in 1916 with the production of roofing tiles. As the founder's sons joined the company, it expanded into commodity trading, consumer products, and vehicles. Notably, in 1947, we shipped manganese ore from Goa to Czechoslovakia, marking our first venture into resource mining and trading.

Recognizing the opportunity to expand mining operations, especially to support Japan's post war economic strategy, one of the brothers, Vishwasrao Chowgule, traveled to Japan. He secured a deal that allowed the Japanese to fund a mechanized mining operation in exchange for a supply of iron ore, a critical raw material for their steel mills.

This pioneering mechanized mining operation in India led to the emergence of various ancillary support industries. The Chowgule family expanded to meet this demand, from constructing and repairing barges to manufacturing industrial explosives.

In the ensuing years, each of our enterprises charted its own growth path, continually developing products to meet evolving client needs and exploring new horizons

OUR VISION

"To be the most valued international Ship & Rig Repair Yard and Fabrication load-out facility in India by our Customers & Employees"

INTRODUCTION

Nestled 70 nautical miles off India's west coast, Chowgule Lavgan is an ultra-modern shipyard setting new benchmarks in the industry. With a state-of-the-art facility tailored for ship repair, refit, and conversion; rig repair; and offshore structure fabrication and decommissioning, the yard brings advanced capabilities and seamless operational flow.

From commercial vessels to specialized defence projects, for the Indian Navy and Coast Guard, the shipyard's deep expertise and rigorous quality standards ensure every project is handled with precision and care. Its strategic position in sheltered waters near Jaigad enables consistent year-round operation, even during the monsoon season, supported by expansive infrastructure including 6 dry berths, 260m long jetty for afloat repairs, 80m long load-out jetty and mechanized Syncrolift docking system.

Belonging to the century-old Chowgule conglomerate, the Lavgan facility combines a legacy of maritime excellence with cutting-edge technologies, delivering cost-effective, safe, and high-quality solutions for the toughest marine and offshore challenges.

OUR EXPERTISE

Every vessel and rig tells a story of purpose, precision, and performance. At Chowgule Lavgan Ship Repair, we partner with you to ensure that story continues stronger and more reliable than ever. With a client-first approach and a deep understanding of maritime challenges, we deliver tailored repair solutions that keep your operations moving forward, seamlessly and safely.

COMMERCIAL SHIP REPAIR

- 450+ vessels completed till date
- 70+ Clients
- Indian and International Clients

Types Repaired

- | | |
|----------------|--------------------|
| • OSV | • AHTS |
| • Barge | • Passenger Vessel |
| • Bulk Carrier | • Dredger |
| • Tug Boats | • Floating Crane |
| • CRV | • MSV |
| • PSV | • Casino |

RIG REPAIR

- 10+ rigs completed till date
- 5+ Clients
- Indian and International Clients

Types Repaired

- Jack Up Rigs
- Drill Ships

From safeguarding national waters to supporting offshore infrastructure, our capabilities are built on precision, discipline, and trust. Whether it's restoring defence vessels to peak performance or executing complex offshore fabrication and decommissioning projects, we deliver with unwavering commitment and technical excellence so you can focus on what matters most, mission success and operational continuity.

DEFENCE SHIP REPAIR

- 35+ vessels completed till date
- Clients – Indian Navy & Coast Guard
- 100% compliance with Defence Protocols

Types Repaired

- FPV
- Ammunition Barge
- FIC
- Ferry Craft
- PCV
- Water Barge
- OPV
- IB

OFFSHORE STRUCTURE FABRICATION & DECOMMISSIONING

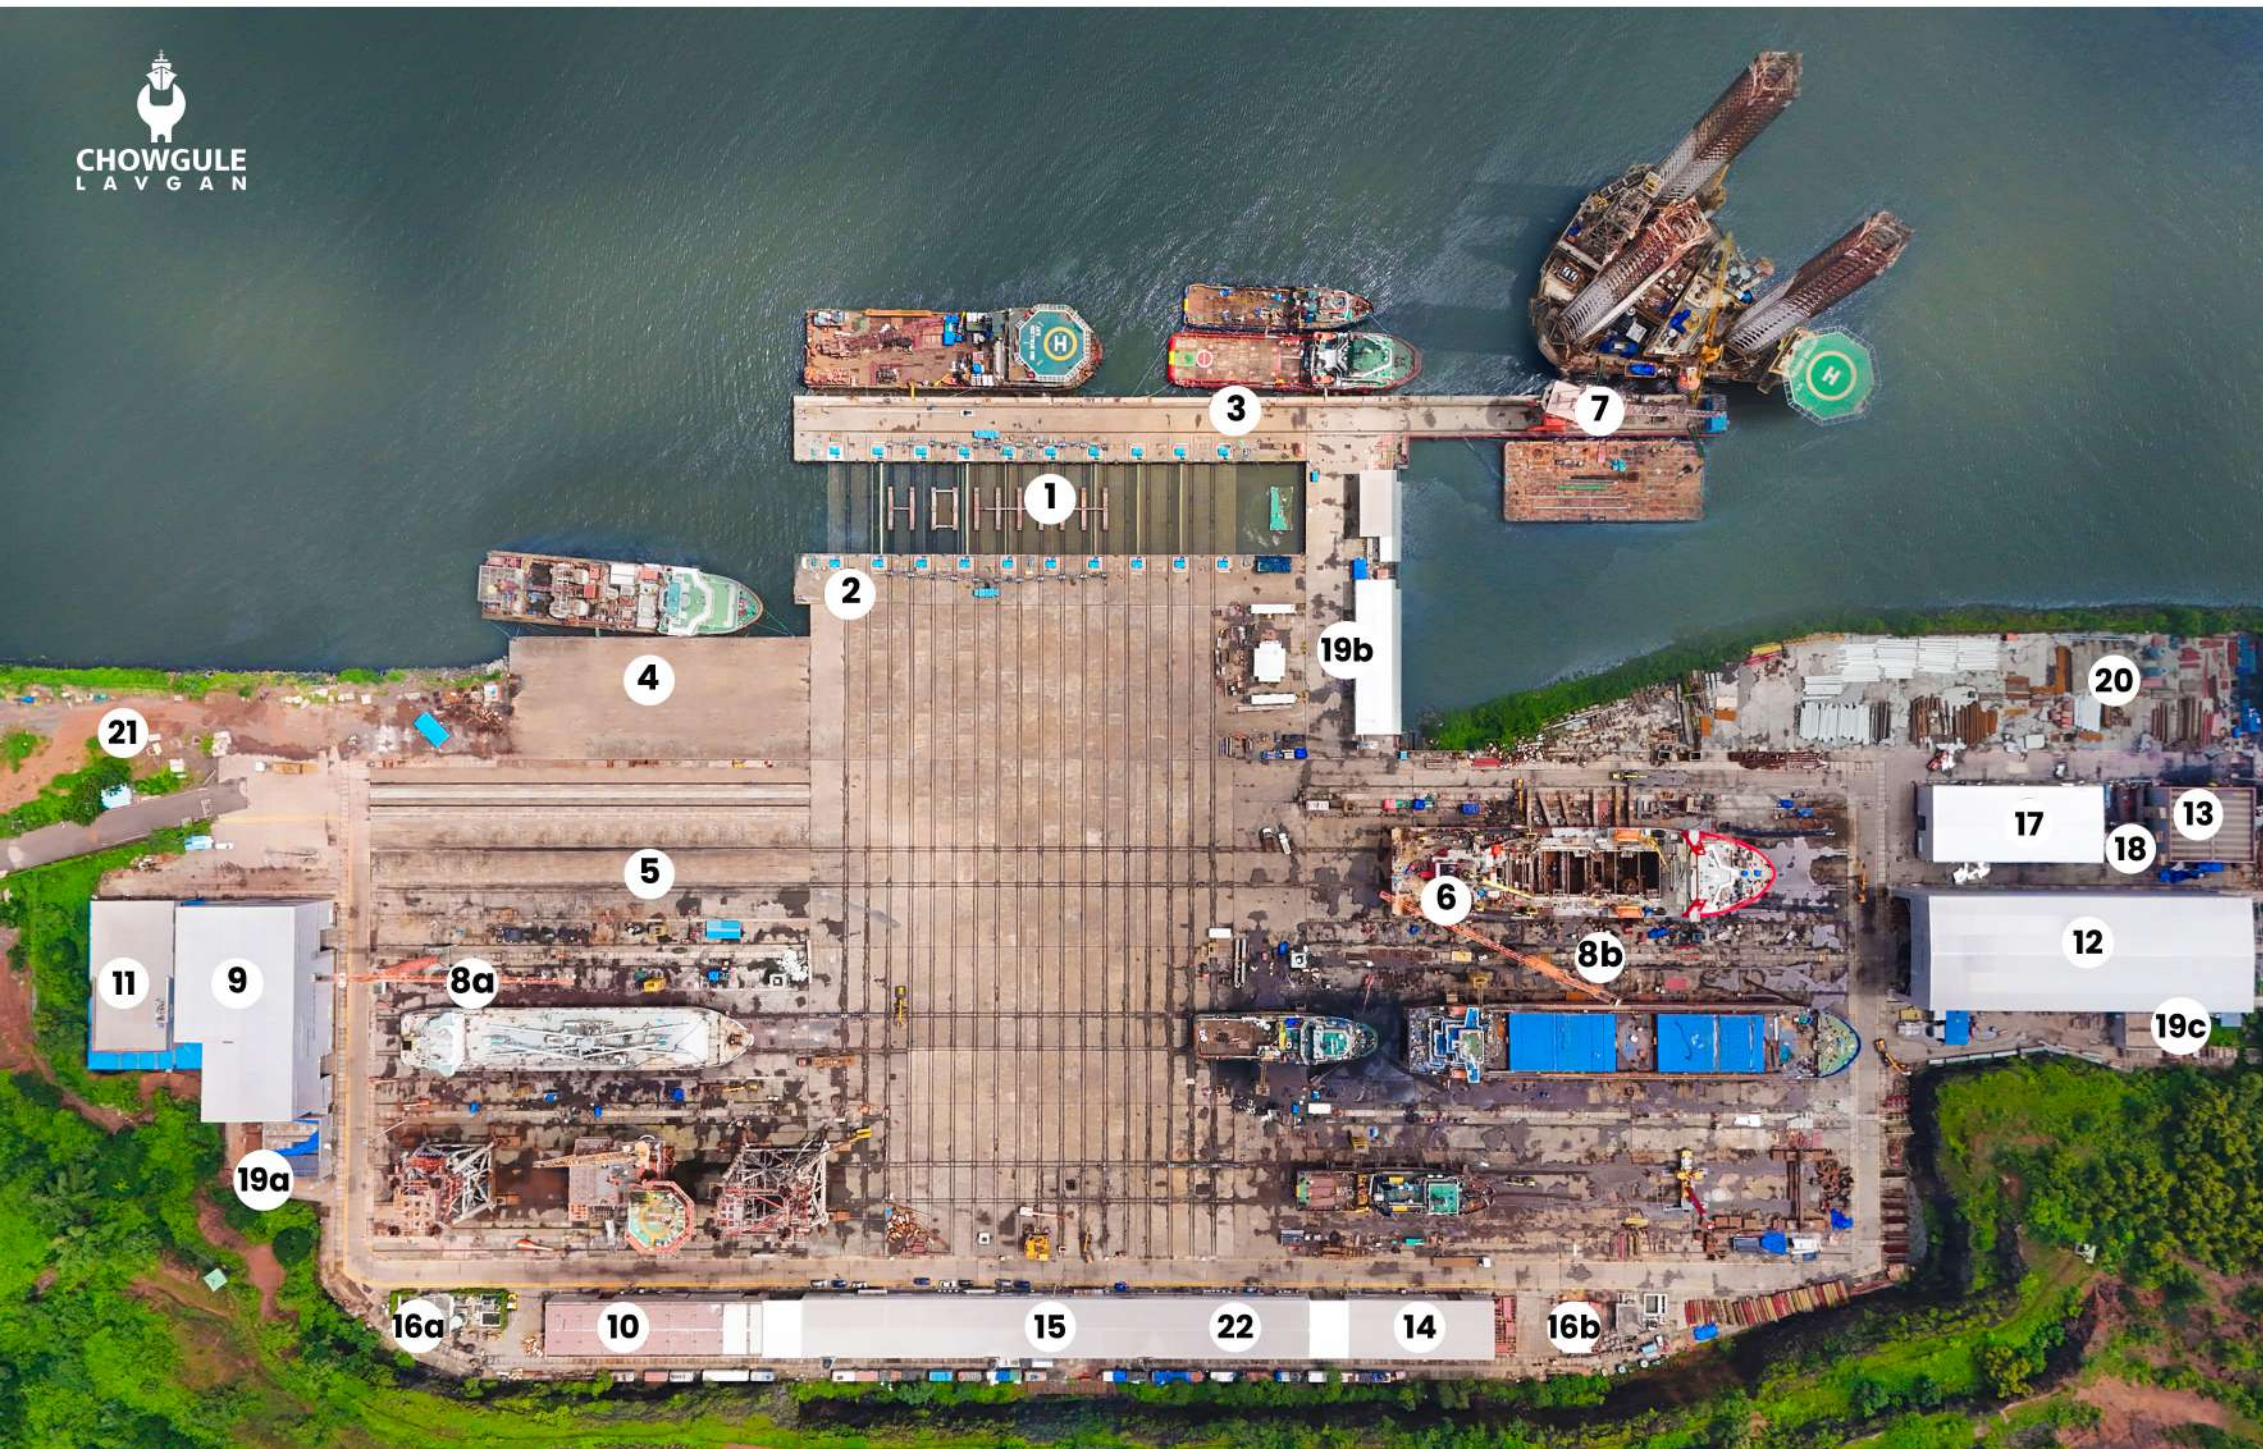

- 8 High Value Projects done till date
- 7 Fabrication Projects
- India's 1st Offshore Decommissioning

Major Projects

- Decommissioning of Tapti Structures
- Fabrication of Riser Guard & Boat Landing
- Fabrication of PLEM
- CALM Buoy Refurbishment

FACILITIES AT A GLANCE

1. Syncrolift

- 116 x 26m table
- Ships upto 140m LOA
- Lift Capacity 7655T
- Max docking draft 6.0m
- Supplied by Rolls Royce

2. Ship & Module Transfer System

- Total lift capacity 10,000T
 - Load levelling technology
 - Serves all six berths
 - Supplied by IMG
3. Wet Berth 260m @ 10m draft
 4. Load in/Out Jetty - 80m @ 6m draft
 5. Dry Berth 1, 2 & 3 - 120m x 40m
 6. Dry Berth 4, 5 & 6 - 150m x 40m
 7. Jetty Crane 25T

8. Tower Crane 10T - 2nos
 9. Mechanical Workshop
 10. Piping Workshop
 11. Electrical Workshop
 12. Steel Workshop
 13. Blasting & Painting Shop
 14. Rigging & Carpentry Shop
 15. Amenities Building
 16. STP & ETP
 17. CNC Cutting Shop
 18. Gas Store
 19. Sub Stations - 3nos
 20. Laydown Area
 21. Scrap Yard
 22. Warehouse

MAJOR MACHINERY

- CNC Plate Cutting Machine (Make - Messer)
- CNC Pipe Profile Cutting Machine (Make - Mueller Opladen)
- Plate Rolling Machine (Make - Davi)
- Hydraulic Press
- Horizontal Boring machine
- Surface grinder
- SAW welding machine
- CO2 & SMAW welding machines
- Lathe Machines
- Drilling machines
- Full range of material handling equipment
- Other mechanical machinery

SYNCROLIFT

OUR SERVICES

At Chowgule Lavgan Ship Repair, we offer a comprehensive suite of mechanical and steel services tailored to meet the evolving needs of the maritime and offshore industries. From propulsion system overhauls to structural steel fabrication, our solutions are engineered for reliability, efficiency, and long-term performance.

MECHANICAL

Expertise

- Main Engine overhauling
- Propulsion and Rudder repair
- Stern tube repair
- Thruster overhauling & modification
- Deck Crane overhauling
- Cooler cleaning
- Winch overhauling
- Pump & valve repair and more

STEEL

Expertise

- Hull and deck repair
- Bulkhead repairs ensuring watertight integrity
- Kort nozzle & A-bracket renewal
- Hatch cover plating
- Refurbishment of superstructure
- Accommodation repairs
- Deck wooden sheathing renewal

ELECTRICAL

Expertise

- Shaft generator overhauling
- Control panel retrofitting
- Motor & alternator rewinding
- Load trials of alternator and shaft generators
- Balancing of rotors & blower impeller
- Bearing & shaft sleeves renewals

At Chowgule Lavgan Shiprepair, we combine technical precision with operational agility to deliver specialized services that support every stage of vessel maintenance. Whether it's restoring pipeline integrity, preparing surfaces for longevity, or ensuring compliance through rigorous inspections, our teams work with purpose and precision.

PIPING

Expertise

- Repair and fabrication of piping systems
- Renewal of high-pressure lines
- Fabrication of sea chest strainers
- Chemical cleaning & flushing of hydraulic lines
- Dredger suction & discharge line fabrication
- and more

BLASTING & PAINTING

Expertise

- Grit blasting (SA1, SA2, SA2.5)
- Hydro-blasting
- Hard scraping, Degreasing, Power tooling, Chipping, scaffolding
- Spray painting, Superstructure painting
- IMO & IWS, Plimsoll and Draft marking, Cutting line
- Tank Cleaning

QA/QC

Expertise

- Class certified manpower
- Approved procedures and testing
- Advanced NDT techniques (MT, PT, UT, RT, ECT)
- Compliance with international rules and codes ensuring adherence to highest industry standards

HEALTH, SAFETY & ENVIRONMENT

Target Zero Accidents

All incidents are preventable

Compliance First

Adhere to all CLSPL HSE standards & systems

Risk Management

All risks controlled at ALARP levels

Environmental Care

Zero accidental hazardous discharge

Responsible Disposal

All waste managed in approved manner

Framework for Safety

HSE-MS guides all ship repair projects
