

We connect the future.

50

YEARS OF HERITAGE  
IN INNOVATION

Cavotec is a leading cleantech company with 50 years of heritage in innovation, designing and delivering advanced connection and electrification solutions that drive the decarbonisation of ports and industrial applications.

Our systems ensure safe, efficient, and sustainable operations for a diverse range of customers and applications worldwide.

# Our solutions ensure safe, efficient and sustainable operations

## Automation and electrification at our core

### Automation

- Automated vacuum mooring
- Automatic Plug in system for port cranes and vehicles for e-vessels for heavy-duty e-vehicles

### Electrification

- Shore power cable management for ports and vessels
- Charging systems for e-vessels and heavy-duty e-vehicles
- Power connectors for industrial use
- Port crane electrification
- Motorised and spring driven reels for mining and industry

Safer

Efficient

Sustainable

# High-quality solutions and services for every need

At Cavotec, our customers can find not only the solution itself, but the qualified service that goes with it.

Our customer centric and global organisation enables the delivery of high-quality products, solutions and services around the world.

We partner with our customers right from the design stage of projects which guarantees engineering solutions that match specific requirements and challenges.

Our business is divided into three areas:

**Ports & Maritime**

**Industry**

**Services**

# Ports & Maritime

We develop automation and electrification technologies that drive sustainability at ports, terminals, and other marine applications.

Our solutions are key to the modernisation of ports and terminals, increasing efficiency and reducing environmental impact, as well as increasing occupational health and safety.

Our offering for ports and maritime include **crane electrification and automation**, **ShorePower**, and our **automated mooring system MoorMaster®**.

Automated vacuum mooring

ShorePower

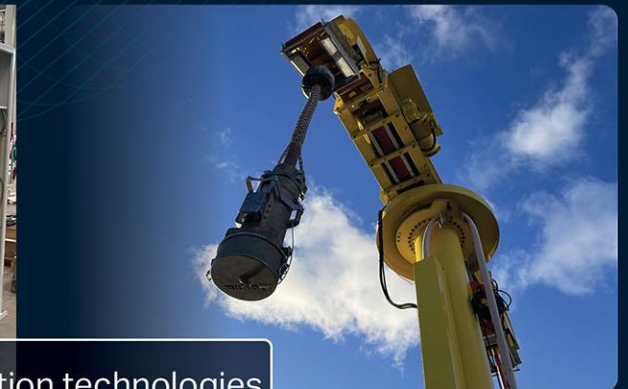

Crane electrification and motorised reels

E-vessel charging

Electrification technologies

# Industry

We design and assemble automation and electrification systems for a wide range of industrial segments.

All our industry technologies support our customers to achieve safe and efficient operations.

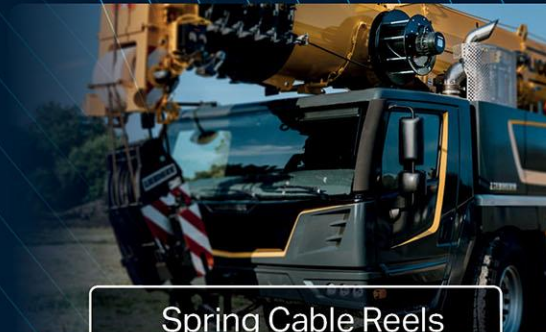

The Industry business offers **electrification solutions for surface and underground mining, cranes, energy, processing and transportation solutions** such as electric trucks and other types of industrial vehicles.

EV charging solutions

Radio Remote Control and Human Operator Interface

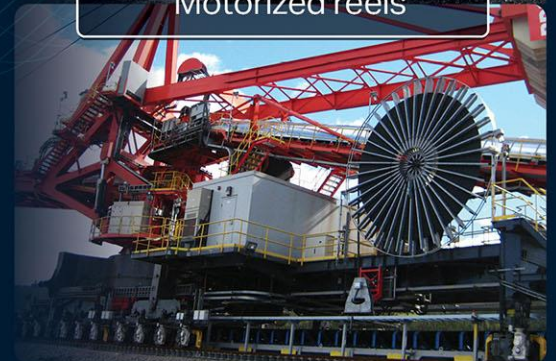

Spring Cable Reels

Connectors

# Services

120

Service Experts

80+

Countries served

60,000+

Installations  
worldwide

Our services support our customers in achieving safe, efficient, and reliable operations.

The Services business leverages the technical expertise of our engineers to generate value for customers by maximising the availability of their assets, reducing operating costs, and extending equipment lifespan.

Our local sales offices around the world are backed by expertise and respond to all types of service and support requests coming up.

## Examples on Cavotec's Services offerings:

- Installation
- Commissioning
- Training
- Inspection and repairs
- One-off preventive maintenance
- Long-term service agreements
- Remanufacturing
- Upgrades

# Service level agreements

1

## **Total CavotecCare**

With Total CavotecCare, you have a dedicated Cavotec expert on-site to maximise asset availability and minimise operational risk.

2

## **CavotecCare Enhanced*Plus***

CavotecCare EnhancedPlus is a comprehensive maintenance scheme that includes consumables to maximise asset availability.

3

## **CavotecCare Enhanced**

In addition to the benefits of our CavotecCare plan, CavotecCare Enhanced gives operators priority access to Cavotec experts in the event of breakdown, thereby minimising downtime.

4

## **CavotecCare**

Our CavotecCare service provides operators with an annual equipment assessment to plan for or anticipate future maintenance requirements.
