MARINE CCTV SYSTEM

CCTV system designed for extremely safe area or hazardous area with camera station/housing constructed from 316L ingress protected up to IP66/IP67, varifocal or zoom cameras for use in marine harsh industrial environments, configured for indoor or outdoor use for process monitoring or surveillance based on flexible analogue or IP system architecture.

Key Features

- 316L stainless steel construction or corrosion resistant aluminum (LM25) stainless steel
- Ultra-low illumination
- 120 dB true WDR
- C5-M, NEMA 4x anti-corrosion standard
- Protection degree: IP66, IP67, IP68.
- Smart tracking, smart detection, EIS, defog
- Models available in Analogue or IP version
- Designed for use in marine & heavy industrial environment.

BNWAS

The purpose of a bridge navigational watch alarm system (BNWAS) is to monitor bridge activity and detect operator disability which could lead to marine accidents. The system monitors the awareness of the Officer of the Watch (OOW) and automatically alerts the Master or another qualified OOW if for any reason the OOW becomes incapable of performing the OOW's duties.

- Exact compliant with IMO resolution MSC 128(75)
- Applied all marine class type approval & certificate.
- Monitors the watch officer's presence
- Various Interface with Rs 485, NMEA, etc.
- High Reliable Operation (PIR Motion Sensor)
- Applicable to Various Applications using Quad Zone Logic
- Emergency Call Function
- Interface to VDR, Auto-pilot & Ship's Alarm System

OUR SERVICES

Our Strong Growth has been as a result of consistently delivering quality work both on time and on budget while maintaining the class requirement.

AGILITY:

: MBPT Registered Ship Repairer hence faster service delivery.

: We maintain sufficient stock of important spares and products.

: Service Capabilities.

: Average Resolution Time-8hr.
