## SHIPREPAIR & CONVERSIONS

Member of

## About us

99 years ago, on 7th October 1926 the Town Council of Gdynia passed the resolution for the necessity of establishing a shipbuilding enterprise, defined its shape and the site for its location. That day is the date of establishment of Nauta Shiprepair Yard.

Today Nauta with easy sea access offers excellent conditions for performing works for even the largest vessels operating on the Baltic Sea. The diversified core business activity is based on two segments: repairs & conversions of merchant vessels and defense production.

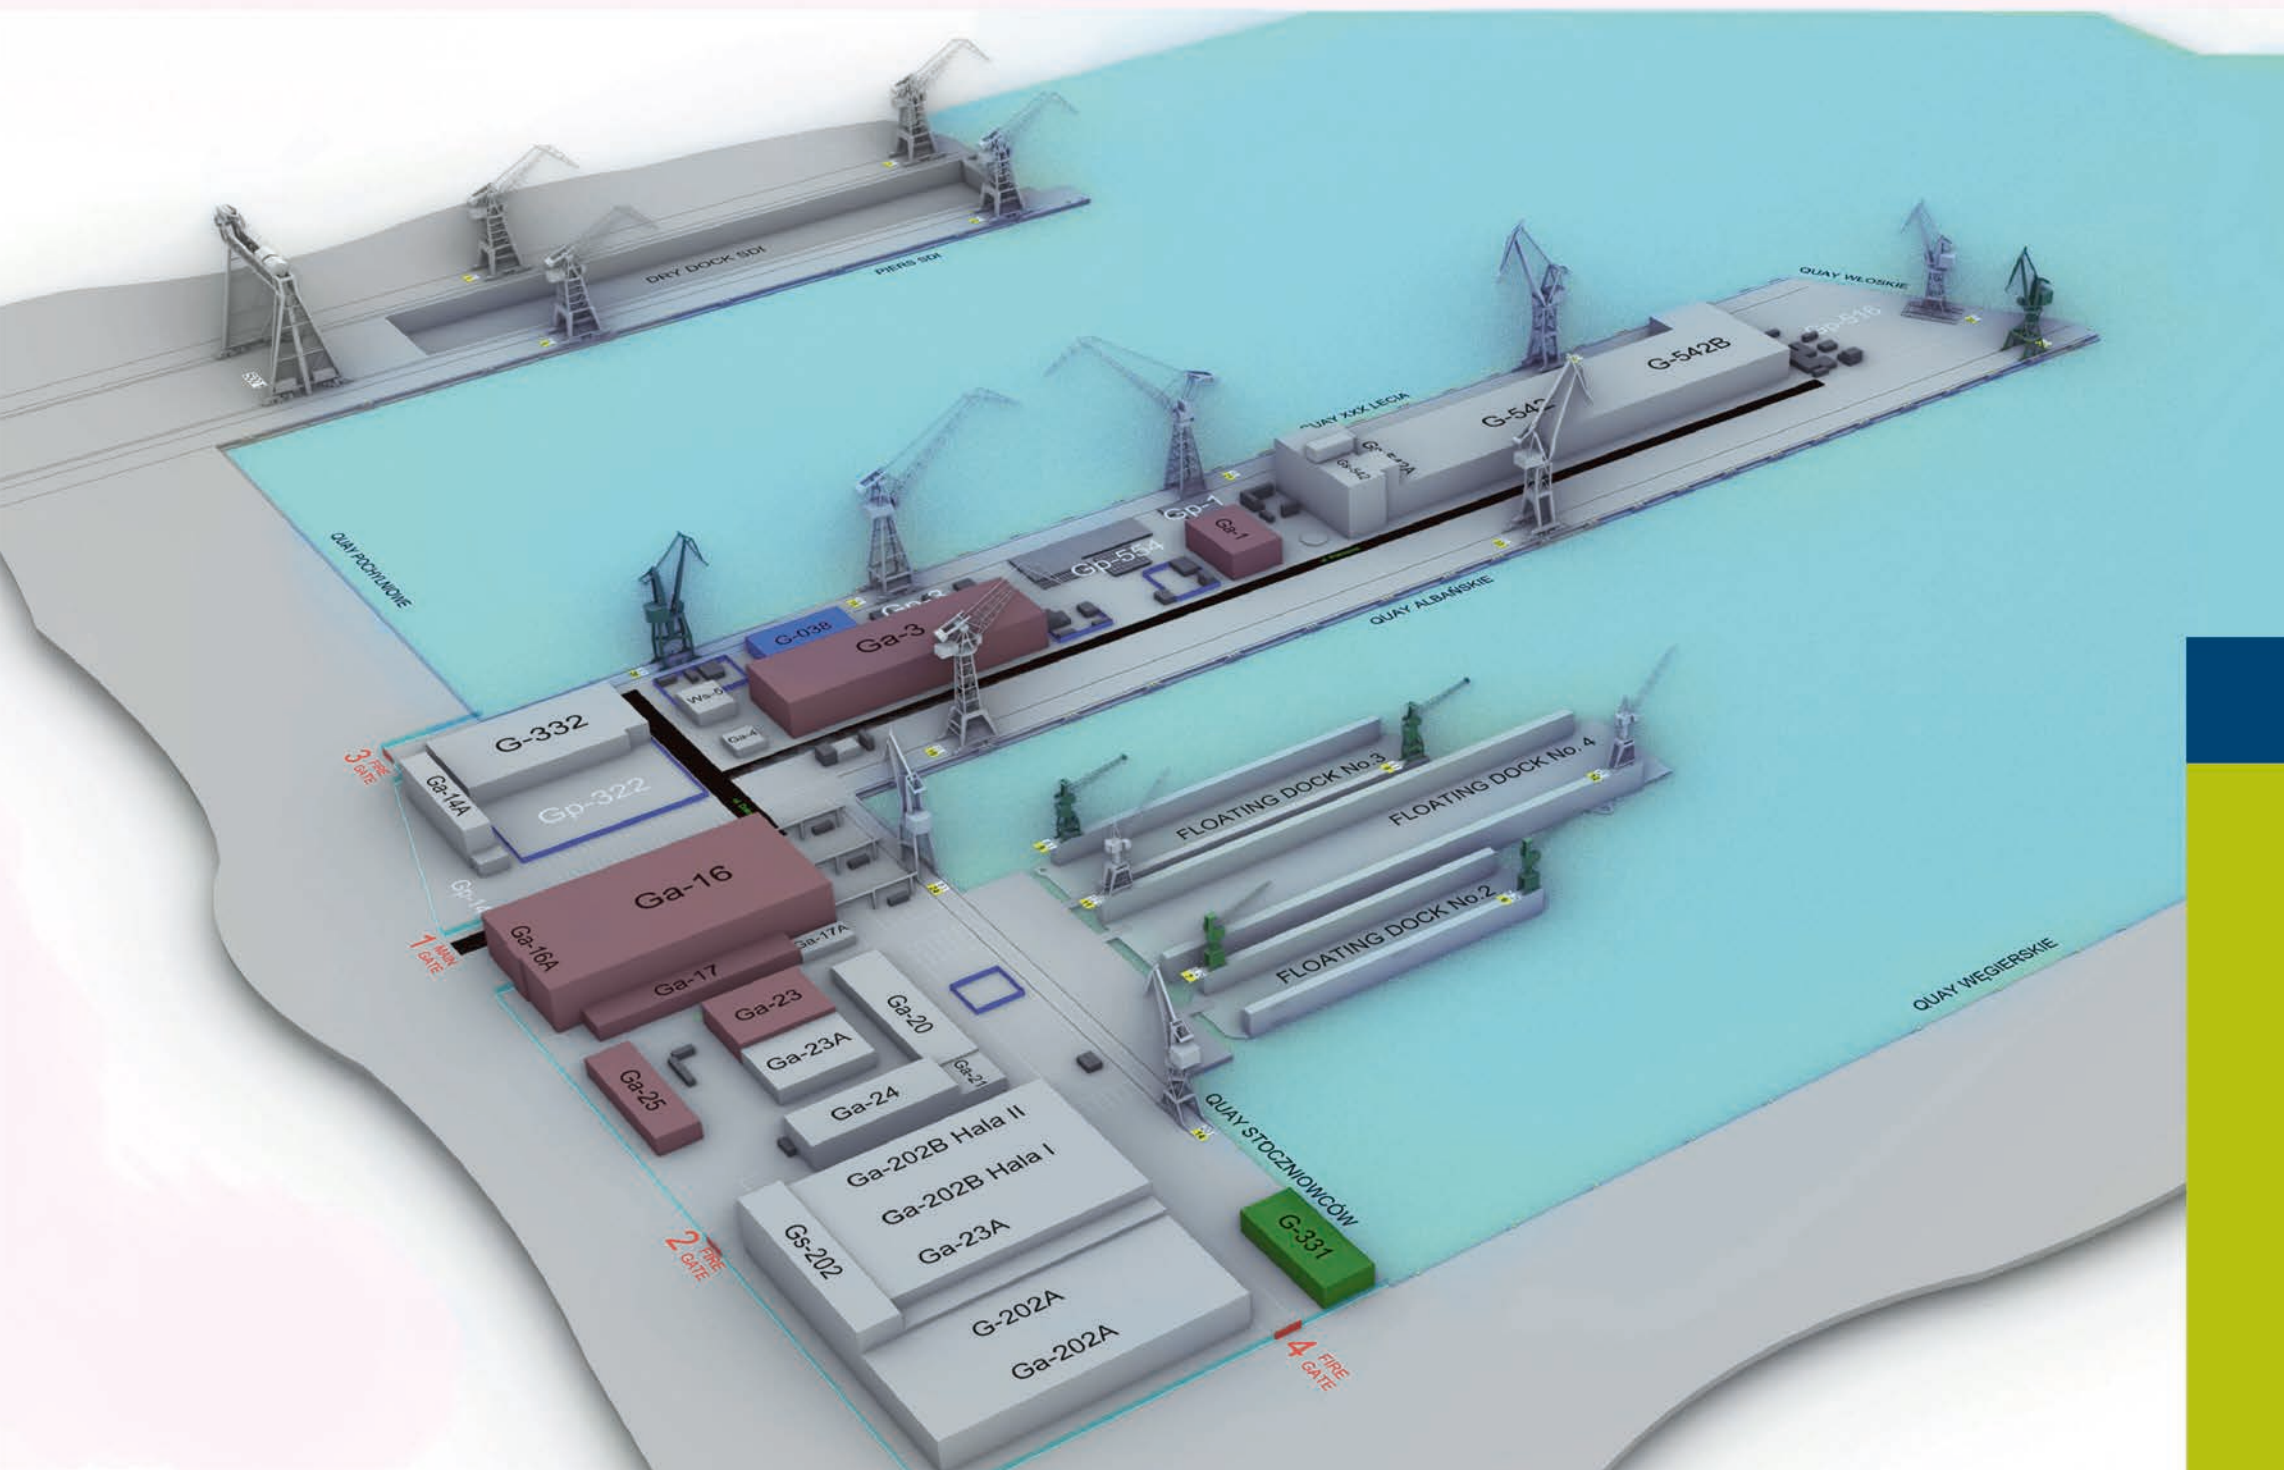

The yard is just 23 kilometers from GDANSK LECH WALESIA airport and 5 minutes' drive from GDYNIA city center with numerous hotels and recreation facilities.

## Docking facility \*

	Dimension [m]	Lifting capacity [t]
Dry dock SDI	240x40	n/a
