

A new world bridging the oceans and humanity.

As everyone becomes interested in the world beyond land,  
we venture into the unexplored realm of the oceans,  
which comprise 71% of the Earth.

Sustainable Maritime IT for Humanity

## Our Verticals

---

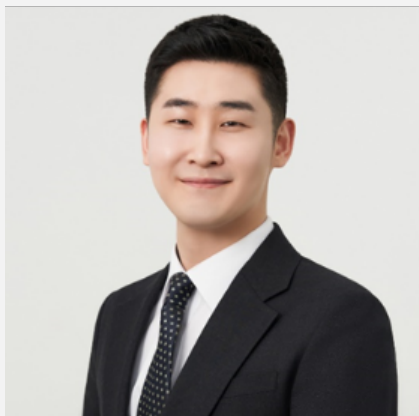

Mapsea integrates navigator expertise with advanced IT to provide All-in-one maritime data solutions.

Mapsea offers real-time global ship monitoring, route planning optimization, AI-based danger detection, and customized data-driven solutions.

Furthermore, we are expanding into the fintech sector for carbon finance to address EU-ETS regulations.

## Our Team

---

Jisoo Kim  
CEO

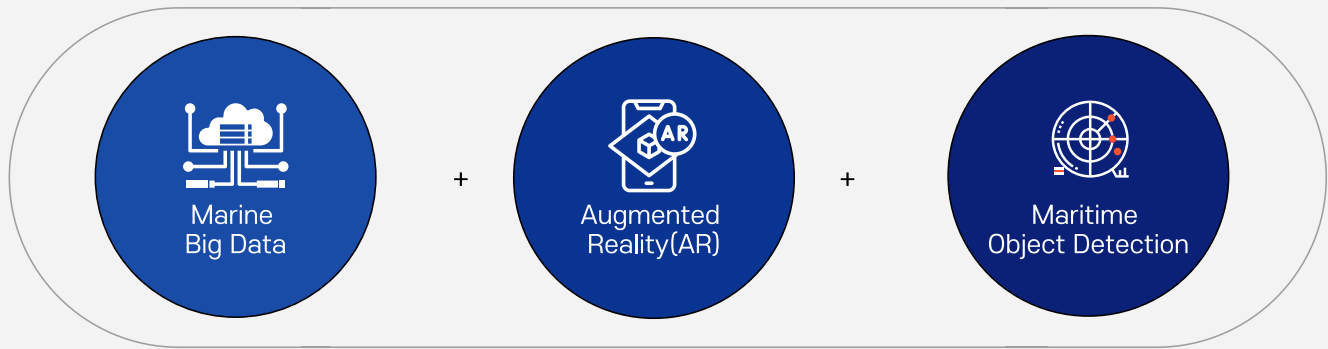

Hongrai Cho  
COO

Unggyu Kim  
CTO

## Research Field

---

Using global maritime data, we provide information for safer and more efficient navigation.

Combining real-time vessel data with a mobile camera, we instantly provide users with necessary information.

We detect maritime objects around vessels and promptly alert users to hazards.

## Our Services

---

### maspea NAVIGATION

All-in-One comprehensive maritime solution providing the most essential data at the most critical moments.

### mapsea CONNECT

All-in-one fleet management solution with real-time land and sea monitoring

### mapsea Pilot Plug

A cutting-edge interface device that extracts AIS data from ships, and direction to other electronic devices or software systems.
