# About Us:

Azimuth Maritime Solutions, based in Jamnagar, Gujarat, is a trusted provider of specialized maritime services, surveys, and equipment support. With a strong focus on professionalism and global standards, we serve clients across India and the UAE.

## Our Mission

To deliver high-quality maritime services with professionalism and integrity, ensuring our clients achieve maximum safety, compliance, and efficiency in all their maritime operations.

## Our Vision

To be recognized as the most trusted and innovative maritime solutions provider in India and the Gulf region by continuously upgrading our technology, expertise, and customer service.

2

# Strategic Service Solutions For Reuce Costs

3

## Support For Obsolate Equipments

Azimuth Maritime offers reliable refurbished Navcom equipment—both modern and obsolete—sourced from ship-breaking yards, with warranty options based on specific needs.

## Remote Diagnostic Support

Azimuth Maritime's technical team offers 24/7 support for NAVCOM issues, providing free remote troubleshooting, fault analysis, and guidance to minimize downtime and boost efficiency.

## FleetCare Maintenance Solution

Azimuth Maritime offers global service packages with on-site support, covering radar, gyro, VDR maintenance, and more to keep vessel systems operating efficiently.

## Equipment Retrofit Services

Azimuth Maritime provides trusted Navcom retrofit solutions via global OEM partners like Sailor, Furuno, JRC, and more—ensuring expert installation, genuine parts, and full warranty by certified engineers.

## Smart Maintenance Programs

Azimuth Maritime's all-in-one service packages cover SRT surveys and Navcom equipment, ensuring class compliance while reducing costs and simplifying vessel operations.

## One-Stop Marine Service Hub

We provide complete repair services for all vessel types—covering hull, machinery, and structural work—to ensure fast, safe return to sea.

# Certified NDT Inspection & Certification Services

4

## Approved By IACS Member Classification Societies

We provide a full suite of Non-Destructive Testing (NDT) services specifically designed for the marine and offshore industry, with approvals from leading IACS member classification societies. Our certified inspectors conduct detailed evaluations to ensure the structural integrity, seaworthiness, and safety compliance of all types of vessels and marine structures.

### Our NDT Service Capabilities For Ships Include:

#### ➤ Ultrasonic Testing (UT):

Precise detection of internal flaws and material thickness in hull structures, piping, and critical welded joints.

#### ➤ Magnetic Particle Testing (MT):

Identification of surface and near-surface cracks in ferromagnetic components such as deck fittings, anchors, and crane structures.

#### ➤ Dye Penetrant Testing (DPT):

Surface crack detection on non-porous components, including stainless steel fittings, welds, and tank surfaces.

#### ➤ Visual Inspection (VT):

Comprehensive visual assessment of hull plating, weld seams, tanks, and structural supports.

#### ➤ Radiographic Testing (RT):

Internal flaw detection in ship components using advanced X-ray or gamma ray imaging techniques.
