

# Seawater- / Scrubber Piping

Metaline Series 700 – Corrosion protection for seawater systems

To reline used piping systems or for the initial treatment of new tubing. Particularly suitable for installations suffering from severe particle impact and abrasion

## Applications

- pipes (starting at 50 mm / 2# diameter)
- curved or straight tubes
- flange coatings
- ballast water treatment systems
- ballast water piping
- seawater inlets
- scrubber systems

## Reference

- rubberlike homogenous spray solutions for bended pipes (pic. 1)
- smooth surfaces – even on used parts suffering from pitting corrosion (pic. 7)
- **seamless** protection concept from the flanges via the tube (pic. 8)
