## COMPANY PROFILE

In the marine industry, time is money. Having a single source solution to all your needs - from ship design to machinery package supply - means quicker returns on investments. We are your answer. Parikh Power is dependable, experienced and committed to your success.

With a single call, you will have access to the entire range of solutions for the marine industry, personalised service and guaranteed customer satisfaction.

Our expertise ranges from fishing to commercial marine and defence, with a collective experience of more than 100 years in the Marine industry.

Parikh Power represents 9 reputed international brands in this segment, all of which boast excellent market positioning.

Our investments lie in a technically sound team to provide excellent post sales support so that each of our clients is assured the highest quality marine equipment and service.

For more than 30 years, Parikh Power has consolidated its position as India's leading assembler of IACS-certified marine DG sets and Pump sets for customers around the world. Assembled at our IRS-approved factory, generator sets feature a Cummins or Simpson base engine and are renowned for their reliability, dependability and performance. We design and manufacture marine generating sets and controls for the provision of: Main Power, Ancillary Power and/or Emergency Power. They range from individual and multiple set systems and various cooling configurations, to control panels and acoustic enclosures.

### Some key features of our Gensets:

- Fit with electronic governing for optimal step load acceptance
- Engineered for ease of vessel integration and less complex mechanical connections
- Multi-station alarm and monitoring panels connected via a local digital network for complete system on classed sets
- Integrated alarm systems can be configured to communicate digitally with ship central data and alarm system
- Compliant to IMO Annex VI Regulation 13

We are the authorized GOEM/OEA of Cummins Generator Technologies India Private Limited & Crompton Greaves Limited.

# OUR PRINCIPALS

**MACDUFF SHIP DESIGN**  
Naval Architects & Marine Consultants

As prolific naval architects and ship design consultants, MacDuff has worked with ship owners / operators and shipyards globally on a vast range of vessel types and sizes. Its bespoke designs have the approval of numerous classification societies.

Since the 1950s, Hydromaster has supplied innovative 360-degree steerable thrusters that cater to various operational and applicational requirements. Customisable designs and units available as full propulsion packages make it one of the most sought-after companies in the world.

Wills Ridley manufactures hydraulic steering gear with an ISO 9001 quality assurance certification. Since 1963, its technologically advanced products - designed from standard & tailored components - have been exported all over the world for leisure, commercial and military vessels.

FIFI marine water monitor equipment from Counterfire have proven quality and reliability records that withstand tough marine environments. Its unique patented design allows perfect one-man control no matter the volume of water by balancing pressure in the gun itself.

Kort Propulsion, operational for more than 80 years, designs and supplies the full package of propulsion and manoeuvring devices including propellers, nozzles, tunnel thrusters and rotachocks. Its market includes coastal shipping, offshore, inland waterways, dredging, fishing and ROV.

Echandia Marine AB, Sweden is a reputed company involved in supply of LTO Lithium-ion heavy-duty ESS, which are built and certified for maritime use. Our systems are suitable where durability, safety and power is top priority. All our systems are built for really demanding applications and provide safe & cost-efficient solution with a superior cycle life.

Marine gearbox - Standard Supply for Cummins Engines. As the biggest manufacturer of marine transmissions in South Korea, D-I Industrial Co supplies a wide selection of products that meet innumerable shipping needs. Its gearboxes are supplied as complete units and are ready to use on purchase.

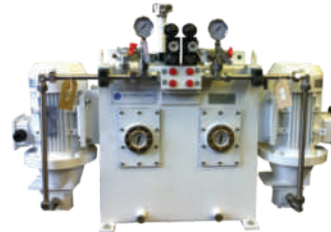

A global leader in cooling technologies for the marine industry since 1949, Fernstrum pioneered the design of the rectangular tube keel cooler. Each cooling solution is engineered to meet the requirements of individual engines, vessels and operating conditions.
