

Responsibility. In Business.

IHM-compliance ensured!

IHM-Development for New and Existing Ships

Having a certified and maintained Inventory of Hazardous Materials (IHM) onboard is a key requirement of “Hong Kong Convention” (HKC) of IMO as well as “EU Ship Recycling Regulation” (EU-SRR). Shipyards for their newbuilds and shipowners for their existing ships are responsible for investigating and documenting Hazardous Materials present in ships. We take care of this obligation and efficiently develop high-quality IHMs for all ships.

The IHM is a technical file belonging to the ship till the very end. We produce fully compliant and detailed IHMs which prevents risks by incompliant IHMs. Otherwise, Buyers could approach Sellers for compensations or EU-PSC posing penalties of up to 200.000,- € and two years imprisonment.

GSR has actively participated in legislative and technical developments since 2005 and knows all details. Our experience ensures the most efficient and compliant outcomes.

IHMs for existing ships are developed by inspection and sampling of suspicious materials by **IHM-Experts**. GSR has trained more than 100 IHM-Experts for their approvals by various classification societies. We have carefully selected the top 50 IHM-Experts for providing IHM-Services around the globe with us. Specifically accredited laboratories and new technology are utilized for ensuring full compliance in every detail. Our IHM software eases later maintenance in an unmatched way. We cut IHM-costs but not corners.

IHMs for new ships are to be developed on hand of MDs and SDoCs from relevant suppliers. The development process is very different from existing ships. GSRs’ team of highly qualified **Material Compliance Experts** takes care of product evaluation, requests to suppliers and control of documents, allocation and quantification of materials onboard and proper reporting. We relief shipyards from these challenges and support suppliers, ensure a smooth IHM-development and certification.

Enjoy being in safe hands!

KPIs:

- IHMs developed for existing ships: 700+
- IHMs developed for newbuilds: 25+
- Approved IHM-Experts: >50
- Material Compliance Experts: 11
- Report availability: 24/7/365
- Clients’ involvement: ~ 3 hrs

Global IHM-Network

We overtake liability and actively avoid unnecessary work for all involved. Guidance provided by us and the software used create an unmatched level of comfort. Our approach guarantees highest efficiency, cost-savings and takes fully care of all obligations, no matter if we service a shipyard, shipowner, supplier or manufacturer.

Show your ESG compliance by providing accurate technical documents and enjoy minimum involvement. Your IHM-compliance without requiring your valuable time is our definition of quality.

We are the cooperating partner of shipping and maritime suppliers.
