Responsibility. In Business.

IHM-compliance ensured!

MD-Development for Manufacturers

Various exclusions from the obligatory provision of material and product data exists in the regulations. They can be applied to finished products as well as to each material used for manufacturing a product. Especially the exclusions for items like household likes appliances, printed circuit boards or soldering points are a key to efficient compliance data management. Parts lists and purchase orders are evaluated by GSRs´ team of highly qualified maintenance experts and only suppliers of relevant items will be approached for providing the relevant material data. This ensures efficient MD-Development for manufacturers and their suppliers as no unnecessary documentation will be requested.

Suppliers can upload their documents on the landing page provided to them and specify if and for how long their documents can be repeatedly used. Data availability increases over time while reducing workload of all involved.

We ensure high-quality MD-Development from product design via order stage to production and after sales. The documents provided are carefully evaluated for ensuring full compliance. This is to yours and your suppliers´ benefit. Our software ensures that the status is transparent and updated MDs as well as Suppliers Declaration of Conformity (SDoC) are constantly archived and updated, all available by a mouse-click 24/7/365.

Enjoy being in safe hands!

The MD-Development Process:

1. Relevancy Check for parts, materials and orders
2. Relevant items: check of availability of documents
   a. Not available: sending requests & forms & manual to suppliers
      i. Monitoring of suppliers´ performance
      ii. Review of documents provided by suppliers
      iii. “Invalid”: denial & targeted guidance to supplier
      iv. “Valid”: further processing & archiving
3. Segregation of “positive MDs” (HazMats present) from “zero MDs” (HazMats absent)
4. MD-Development for product and product groups
5. Archiving own and suppliers´ MDs and SDoCs

KPIs:

- IHM-categorized catalogue-items: 75.000+
- Processed order items: 4.5mio+
- Categorization rules: 3.500+
- Status overview availability: 24/7/365
- Support for supplier of client: 1 hour incl.

Best Performance – further optimized

Only when all parties involved perform, MD- and IHM-compliance can be achieved. We support and ensure best performance of our clients and their suppliers; this is our commitment.

We overtake liability and actively avoid unnecessary work for all involved. Guidance provided by us and the software used create an unmatched level of comfort. Our approach guarantees highest efficiency, cost-savings and takes fully care of your and your suppliers’ obligations. Show your ESG compliance by providing accurate MDs and SDoCs by enjoying minimum involvement. Your MD-compliance without requiring your valuable time is our definition of quality.

We are the cooperating partner of our clients and their suppliers.
