

TTM

***A 3D CAD system developed
for the Korean shipbuilding industry
with features ranging from basic design
to production design***

TTM is a shipbuilding oriented CAD system developed by Timetec Co., Ltd, that supports all technical capabilities from modeling to production drawings. TTM is the latest CAD system aiming to increase both design and production efficiency with its visual and intuitive user-friendly operation, incorporating new technologies such as Solid, Relationship, Parametric, Template & Rule based modeling, Revision control, Undo/Redo, etc.
